

9-6 Subtracting Fractions with Unlike Denominators

$$3. \quad \frac{1 \times 5}{2 \times 5} = \frac{5}{10}$$

$$2: 2, 4, 6, 8, 10$$
$$10: 10$$

$$\frac{3 \times 1}{10 \times 1} = \frac{3}{10}$$

$$\frac{2 \div 2}{10 \div 2} = \frac{1}{5}$$

$$4. \quad \frac{1 \times 3}{8 \times 3} = \frac{3}{24}$$

$$8: 8, 16, 24, 32$$

$$3: 3, 6, 9, 12, 15, 18, 21, 24$$

$$\frac{1 \times 8}{3 \times 8} = \frac{8}{24}$$

$$\frac{21}{24} - \frac{8}{24} = \frac{13}{24}$$

$$\frac{13}{24}$$
